

**Project Information Form**

Project Title	Examining the Value of Travel Time Reliability for Freight Transportation to Support Freight Planning and Decision-Making
University	Florida International University
Principal Investigator	Xia Jin
PI Contact Information	(305) 348-2825 <a href="mailto:xjin1@fiu.edu">xjin1@fiu.edu</a>
Funding Source(s) and Amounts Provided (by each agency or organization)	NCTSPM - \$80,696 FDOT - \$150,000
Total Project Cost	\$230,696
Agency ID or Contract Number	DTRT12GUTC12
Start and End Dates	01/15/2014-01/31/2016
Brief Description of Research Project	Given the growing demand in freight transportation, the emerging needs to better understand freight behavior for better policy and investment decisions, and the increasing role of reliability in freight transportation, the proposed research holds the promise in advancing freight planning practices and research. It will provide some insights on how the freight system users value travel time reliability in their transportation choices. The study results will facilitate local, state, and national agencies in evaluating and prioritizing alternative investment and policy strategies that promote the best use of the freight transportation system and support the dynamic demand of the industries.
Describe Implementation of Research Outcomes (or why not implemented)  (Attach Any Photos)	None to date
Impacts/Benefits of Implementation (actual, not anticipated)	None to date
